MOHAMMED IMAD THOTAN

Business Data Analyst

Dubai, UAE | +971 54 125 6623 | mohammedimad031@gmail.com | LinkedIn | GitHub | Portfolio

PROFESSIONAL SUMMARY

Business data analyst based in Dubai with hands-on experience turning raw data into decision-ready insight using SQL, Python, and Power BI/Tableau. Proven track record building dashboards, automating reporting workflows, and delivering data-driven recommendations to operations and leadership teams across analytics, finance, and business operations settings. Complements analytical depth with hands-on software development experience (React, Node.js, full-stack builds), enabling closer collaboration with engineering teams and faster prototyping of data products. Strong foundation in statistical analysis, requirements gathering, and stakeholder communication, with a builder's mindset demonstrated through an AI-enabled venture seed funded and delivered to Aspire Institute. Comfortable working independently in fast-paced, ambiguous environments and translating business questions into clear, actionable analysis. Seeking Business Data Analyst based roles in UAE.

SKILLS

Analytics & Data: Python, R, SAS, SQL, Sheets, Excel, Power BI, Tableau, Fabric Analytics, ETL, Data Visualization, Colab, BigQuery
AI & Technology: Prompt Engineering, NLP / Sentiment Analysis, Machine Learning, Generative AI Applications, API Integration, Computer Vision, Agile/Scrum, JIRA, React.js, Node.js, Next.js, Full-Stack Development
Business: Management Consulting, Financial Modelling, Commercial Awareness, Strategic Planning, Market Research, Stakeholder Management, Organisational Performance Analysis, Change Management, Business Intelligence, Process Improvement, Hypothesis-Driven Analysis, Structured Problem-Solving
Presentation: PowerPoint, Structured Storytelling, Client Communication, Data-Driven Presentations

EXPERIENCE

Technical Lead – Software Developer | Qlovix | Hybrid *Sep 2025 – Sep 2026*

- Led technical direction and architecture decisions for the software development team, overseeing project execution from client requirements through production deployment across 3+ concurrent engagements.
- Managed and mentored a team of developers, conducting code reviews and setting engineering standards to maintain consistent code quality across React.js, Next.js, and Node.js codebases.
- Owned technical stack and architecture strategy, evaluating and selecting frameworks and tools to balance performance, scalability, and delivery speed across client and internal projects.
- Scaled development process standardization into a formal team-wide framework, reusable UI component libraries, structured planning-to-deployment workflows, and QA checkpoints.
- Served as primary technical point of contact for client stakeholders, translating business requirements into technical specifications and managing delivery timelines across the project portfolio.

Data Analyst Intern | Meknoid Solutions Pvt. Ltd *Jul – Aug 2025*

- Built interactive Power BI and Excel dashboards surfacing 10+ key business metrics, reducing time-to-insight for operations leadership and enabling faster data-driven decision-making.
- Automated 3+ recurring reporting workflows using Python, saving ~8 hours of manual effort weekly (~70% reduction in report preparation time) and improving accuracy across multiple business functions.
- Engineered SQL queries to extract and structure data across multiple databases, streamlining cross-functional reporting pipelines for 4+ business teams.
- Conducted competitive benchmarking and market research to support strategic planning; developed structured PowerPoint presentations to communicate hypothesis-driven recommendations to senior leadership.
- Translated complex analytical outputs into actionable business insights, enabling evidence-based decision-making and supporting implementation of operational improvements.

Full Stack Web Developer Intern | Zephyr Technologies *Jun – Jul 2025*

- Developed responsive web applications supporting digital transformation initiatives, integrating front-end and backend services to deliver measurable improvements in operational efficiency.
- Implemented structured version control workflows using Git, enabling efficient cross-team collaboration and reducing deployment errors across distributed development sprints.

Business Operations & Project Management Intern | Rainbow Pipes *Apr – May 2025*

- Analyzed production, sales, and supply-chain datasets to identify operational bottlenecks, delivering structured recommendations that drove process improvement across manufacturing and distribution.
- Coordinated cross-functional teams across 3+ departments, tracking project milestones to ensure on-time delivery against operational targets, providing direct stakeholder management experience.

- Designed operational and financial reports for senior management, translating supply-chain data into actionable insights and supporting implementation of production planning improvements.

PROJECTS & INNOVATION CHALLENGES

Google Play Store Product Intelligence Platform | *Python, SQL, BigQuery, Power BI, Looker Studio, Statistics, NLP* | Jul 2026

- Built an end-to-end analytics pipeline on 10,841 apps and 64,296 reviews, from data cleaning through statistical testing to two live BI dashboards, uncovering that app metadata explains <1% of rating variance (R^2=0.008), reframing the core business question toward review-text sentiment.
- Wrote 25 production-quality SQL queries in BigQuery spanning window functions (RANK, LAG/LEAD, running totals) to answer stakeholder-defined business questions, including identifying a 36% negative-review rate in the platform's largest app category.
- Built a VADER-based sentiment pipeline validated at 76.3% agreement against an independent labeling method, translating unstructured review text into a custom User Satisfaction Index adopted across two parallel dashboards (Power BI, Looker Studio).
- Delivered 3 prioritized, quantified business recommendations in a written report and stakeholder presentation, applying rigorous statistical/practical-significance distinctions throughout.

EcoFlow | *1st Place - Entrepreneurship & Product Innovation Challenge*

- Won 1st place in a competitive multi-team challenge by applying structured business frameworks to develop EcoFlow, a full business concept encompassing market research, pricing strategy, brand positioning, growth strategy, and investor pitch.
- Demonstrated end-to-end strategic planning and client-facing communication under competitive evaluation by faculty and industry stakeholders, directly mirroring structured problem-solving expected in consulting delivery.

ExpenseAudit AI | *Multi-Agent AI System | Kaggle x Google AI Agents Capstone 2026*

- Architected a multi-agent expense-auditing platform using Google ADK and Gemini 2.0 Flash, orchestrating three specialized LLM agents (policy compliance, fraud detection, executive reporting) through a Sequential Agent pipeline.
- Built deterministic Python rule engines enforcing spend-policy limits and detecting fraud patterns (duplicate submissions, split transactions, statistical outliers), ensuring every dollar-amount decision came from tested code rather than LLM inference.
- Deployed as a FastAPI service with Docker containerization and 89 automated tests; integrated Google Drive export via a custom MCP Toolset for finance-ready reporting.

ChurnSense AI | *Machine Learning Analytics Project | Jan – May 2026*

- Developed an end-to-end customer churn prediction system on the IBM Telco dataset (7,000+ records), training Logistic Regression, Random Forest, and XGBoost models to achieve ROC-AUC > 0.85, with SHAP explainability to identify key churn drivers.
- Built a Power BI dashboard and Streamlit web application for real-time churn prediction and customer risk scoring, backed by 12+ SQL analytics queries for churn trend analysis and customer segmentation to guide retention strategy.

Superstore Sales & Profit Performance Dashboard | *Power BI Dashboard Project*

- Built an interactive Power BI dashboard analyzing 5,000+ orders and $2.3M in sales from the Superstore retail dataset, using DAX measures to surface KPIs across sales, profit, discount, and regional performance.
- Identified profit leakage from over-discounting on low-margin Furniture products and surfaced regional performance gaps, translating findings into data-driven business recommendations on category focus and discount strategy.

EDUCATION

Bachelor of Business Administration (Business Analytics) *Jun 2026*
Manipal Academy of Higher Education (MAHE), Manipal, India | GPA: 8.9/10
Relevant Coursework: Business Intelligence, Data Analytics, Technology Management, Strategy & Operations

Aspire Young Leaders Program, Cohort 1 *Jan – Apr 2026*
Aspire Institute (Founded by Harvard Business School Faculty) | Competitive global cohort; systems thinking, ethics, and organizational impact.

PCMC - Science (Computer Science) *Jun 2022*
Poorna Prajna PU College (Pre-University), Udupi, India | Grade: 93.3%

LEADERSHIP & ENGAGEMENT

AIESEC Manipal - Contributed to cross-cultural leadership initiatives and international professional development programs.
VSO Manipal - Completed 15+ hours of community service supporting social impact initiatives; recognized for teamwork and collaborative communication.
